

The Stamps of Canada, Chapter III

Based on a Mekeel's Weekly Publication by B. W. H. Poole, with images added

We continue in this issue with a reprinting, with updates and new images, of *The Stamps of Canada*, a booklet that was produced for *Mekeel's Weekly* by Bertram W. H. Poole.

Chapter III.—The First Issue.

In common with the other Colonies of British North America, Canada was granted the privilege of administrating its own postal service in 1850, and in the same year an Act was passed providing for the change. It is hardly necessary to quote this Act in full though the following extracts are of interest:—

Cap. VII.

An Act to provide for the transfer of the management of the Inland Posts to the Provincial Government, and for the Regulation of the said department.

II.—And be it enacted, that the Inland Posts and Post Communications in this Province shall, so far as may be consistent with the Acts of the Parliament of the United Kingdom in force in this Province, be exclusively under Provincial management and control; the revenues arising from the duties and postage dues receivable by the officers employed in managing such Posts and Post Communications shall form part of the Provincial Revenue, unless such monies belong of right to the United Kingdom, or to some other Colony, or to some Foreign State, and the expenses of management shall be defrayed out of Provincial Funds, and that the Act passed in the Eighth year of Her Majesty's Reign, and entitled An Act to provide for the management of the Customs, and of matter relative to the collection of the Provincial Revenue, shall apply to the said Posts and Post Communications, and to the officers and persons employed in managing the same, or in collecting or accounting for the duties and dues aforesaid, except in so far as any provision of the said Act may be insusceptible of such application, or may be inconsistent with any provision of this Act.

VIII.—And in conformity to the agreement made as aforesaid between the Local Governments of the several Colonies of British North America, be it enacted that the Provincial Postage on letters and packets not being newspapers, printed pamphlets, magazines or books, entitled to pass at a lower rate, shall not exceed Threepence currency per half-ounce, for any distance whatsoever within this Province, any fraction of a half-ounce being chargeable as a half-ounce; that no transit postage shall be charged on any letter or packet passing through this Province, or any part thereof, to any other Colony in British North America, unless it be posted in this Province, and the sender choose to prepay it; nor on any letter or packet from any such Colony, if prepaid there; that Twopence sterling the half-ounce shall remain as the rate in operation as regards letter by British mails, to be extended to countries having Postal Conventions with the United Kingdom, unless Her Majesty's Government in the United Kingdom shall see fit to allow this rate to be changed to Threepence currency; that the prepayment of Provincial Postage shall be optional.

That all Provincial Postage received within the Province shall be retained as belonging to it, and that all Provincial Postage received within any other Colony of the British North American Colonies may be retained, as belonging to such Colony. That no privilege of franking shall be allowed as regards the Provincial Postage. That Provincial Stamps for the prepayment of postage may be prepared under the orders of the Governor in Council, which stamps shall be evidence of the prepayment of Provincial Postage to the amount mentioned on such stamps; and that such stamps, prepared under the direction of the

proper authorities in the other British North American Colonies, shall be allowed in this Province as evidence of the prepayment of Provincial Postage in such other Colonies respectively, on the letters or packets to which they are affixed and which have been mailed there.

* * * * *

"Bytown, U.C., Apr 6 1851" double-ring c.d.s. with manuscript "3" (d.) rating on folded letter to Montreal, Canada, reverse with red "Montreal L.C. AP 8 1851" double-ring backstamp—the first day of the new 3d. domestic letter rate notwithstanding distance. The Canadian Government took over the responsibility for the Post Office from the British Government on April 6, 1851. The fact that April 6 in the year 1851 was a Sunday, helps to explain the lack of other examples. Bytown was renamed Ottawa in 1855 when the city was incorporated.

The passage of the above Act and its approval by the Imperial government was followed by a notice to postmasters which gave the date at which the transfer of the postal system from Imperial to Provincial authority was to take effect, gave more explicit instructions with regard to rates of postage, and stated that postage stamps were being prepared. Mr. Howes gives the chief provisions of this Notice as follows:—

Notice to Postmasters.

General Post Office.

Montreal, 14th March, 1851.

Sir:—

I am commanded by His Excellency the Governor General, to communicate to you the following instructions, for your guidance in the performance of your duties, under the New Post Office Law of the 13th and 14th Vict., chap. 17, passed at the last Session of the Provincial Parliament, which will take effect, and supersede the Imperial Post Office Acts, hitherto in force in Canada, on and from the 6th day of April next:

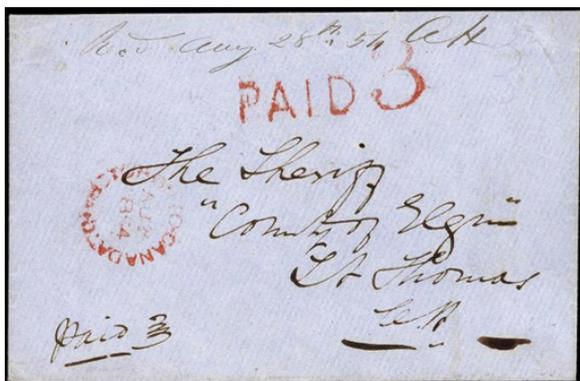

1.—From the above date, all Letters transmitted by the Post in Canada, with the exception of Packet Letters to and from the United Kingdom, will be liable to a uniform rate of Three Pence, currency, per half-ounce for whatever distance conveyed: prepayment will be optional: the charge increasing according to the weight of the Letter, one single rate for every additional half-ounce, counting the fraction of a half-ounce as a full rate, thus:

A Letter, weighing not exceeding 1/2 ounce, will be liable to 3d postage.

A Letter, weighing more than 1/2 ounce, and not exceeding 1 ounce, will be liable to 6d Postage.

A Letter, weighing more than 1 ounce, and not exceeding 1-1/2 ounces will be liable to 9d Postage, and so on.

It will be observed that the above scale differs from that now followed, in advancing one rate for each half-ounce after the first ounce.

1854 Stampless cover from Toronto to London, Canada, with carmine red "PAID 3" handstamp and "Toronto Canada PAID Au 26 1854" c.d.s.

2.—The single Packet rate for Letters by the Atlantic Steam Packet Mails to and from England, via the United States, of 1s 2d sterling, if unpaid, and 1s 4d currency, if prepaid, as also the rate on Letters, by those mails, via Halifax, of 1s sterling, if unpaid, and 1s 1-1/2d currency, if prepaid, remain unaltered, and the present scale of weights is to remain in force as regards such Letters.

Post Masters must be very careful to observe this distinction when taxing letters, weighing over one-ounce, intended for the English Mails.

3.—The regulations now in force with regard to Letters to and from Soldiers and Sailors in Her Majesty's Service, by which under certain conditions such Letters pass through the Post on prepayment of a penny only, remain unaltered.

5.—Letters addressed to New Brunswick, Nova Scotia, Prince Edward's Island, or Newfoundland, are to be rated with the uniform

Dec. 29, 1857 Way letter from St. Anselme (a tiny Quebec town that never established a post office) to New Brunswick, unpaid from St-Anceline and delivered by mail carrier for posting on Dec. 30 at St. Henri, addressed to Fredericton, New Brunswick with routing via Quebec City on December 31. The cover is rated from Canada 3d collect, the Inter-Provincial rate. rate of 3d per half-ounce.

6.—Letters to and from the United States will be liable to the uniform rate of 3d per half-ounce, between the Frontier line and the place of posting or place of destination in Canada; and until further arrangements can be made, this charge on Letters from Canada to the United States must be prepaid at the time of Posting.

9.—The charge on Letters posted at an office for delivery in the same City, Town, or Place, and any additional charge made on Letters delivered at the residence of parties to whom they are addressed, are to remain as at present, until further instructions.

10.—No Franking Privilege is allowed under the New Act, except with regard to Letters and Packets on the business of the Post Office, addressed to or transmitted by the Post Master General.

Chapter III—The First Issue, Cont.

Notice to Postmasters

General Post Office

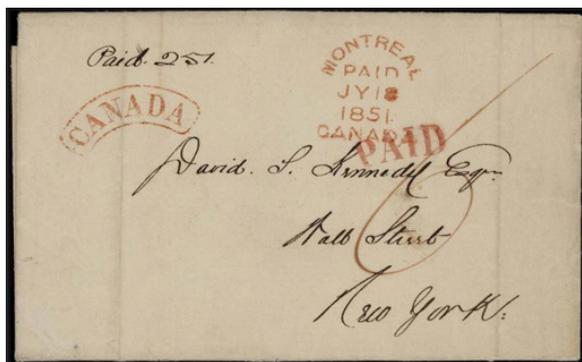

Montreal, 14th March, 1851

[The last provision from this notice stipulated] Stamps for the prepayment of Postage are being prepared and will be distributed for the use of the public at an early date.

T. A. Stayner.

Deputy Post Master General.

Shortly afterwards a Notice, or Department Order, dated April 2nd, 1851, was issued to postmasters regarding the rates of postage between Canada and the United States, California and Oregon. It is hardly necessary to reproduce this in its entirety and it will suffice to state that the rate on single letters to the United States was sixpence currency, equivalent to ten cents in United States money, while to California and Oregon the rate was nine pence currency per half-ounce.

1851 stampless lettersheet to Wall Street, New York, with business enclosure, rated "6" manuscript in red, also with "PAID", "CANADA" Arc in red, and "MONTREAL PAID JY 18 1851 CANADA" handstamps.

On newspapers, pamphlets, etc., the rates were the same as those for Canada itself with the stipulation that all such mail must be prepaid. Certain offices were named for handling the mail between Canada and the United States, viz: Post Sarnia, Windsor, Fort Erie, Queenston [see top of next column] (the channel of communication with the United States for the country west of Toronto), Niagara, Toronto, Cobourg (a communication during summer only, by steamer to Rochester), Kingston, Brockville, Prescott, Montreal, St. John's, Dundee, and Stanstead.

On the 21st of April, 1851, an Order was issued from the Post Office Department referring to the issue of stamps. The most interesting paragraphs from this order are:—

Postage Stamps are about to be issued, one representing the Beaver, of the denomination of Three pence; the second representing the head of Prince Albert, of the denomination of Six pence; and the third, representing the head of Her Majesty, of the denomination of One shilling; which will shortly be transmitted to the Post Masters at important points, for sale.

Any Letter or Packet, with one or more Stamps affixed, equal in amount to the Postage properly chargeable thereon, may be

1850 St. Catharines UC (Upper Canada) to USA double rate folded letter prepaid on SEP 28 1850 and addressed to Albany, N.Y., routing via the Queenston and Lewiston, N.Y. exchange offices on September 29, 1850, with PAID 9d for the 1 ounce under 60 mile delivery double rate to the border (2 x 4-1/2d per 1/2 ounce) plus PAID 20¢ for the 1 ounce double rate for under 300 mile USA delivery to Albany (2 x 10¢ per 1/2 ounce).

mailed and forwarded from any office as a prepaid Letter or Packet; but if the Stamps affixed be not adequate to the proper Postage, the Post Master receiving the Letter or Packet for transmission will rate it with the amount deficient in addition. This Regulation concerning Letters short paid has reference only to Letters passing within the Province.

Stamps so affixed are to be immediately cancelled in the office in which the Letter or Packet may be deposited, with an instrument to be furnished for that purpose. In Post Offices not so furnished, the stamps must be cancelled by making a cross (X) on each with a pen. If the cancelling has been omitted on the mailing of the Letter, the Post Master delivering it will cancel the stamp in the manner directed, and immediately report the Post Master who may have been delinquent, to the Department. Bear in mind that Stamps must invariably be cancelled before mailing the Letters to which they are affixed.

It is rather interesting to note that the series comprised only three values, though the postal rates, as shown in the Notice quoted above, and further amplified in a lengthy set of "Regulations and Instructions" called for numerous rates of 1/2d and 1d as well as 7-1/2d so that it certainly seems strange that no provision was made for stamps by means of which such rates could be prepaid.

The beaver is typical of Canada, for the prosperity of the Colony is largely founded on this animal, whose skin has been a valuable article of commerce since the days of the early trappers in the land of the maple tree. The choice of a beaver as the central theme of the design of Canada's first stamp—the 3d value—is, therefore, particularly appropriate. The stamp is rectangular in shape and the centrepiece is enclosed within a transverse oval band inscribed "CANADA POSTAGE" at the top, and "THREE PENCE" below. Above the beaver is an Imperial crown which breaks into the oval band and divides the words "CANADA" and "POSTAGE." This

Canada Sc. 1

crown rests on a rose, shamrock, and thistle (emblematic of the United Kingdom) and on either side are the letters “V R” (Victoria Regina, i.e. Queen Victoria). In each of the angles is a large uncolored numeral “3”. Mr. Howes tells us that this stamp was designed by Sir Stanford Fleming, a civil engineer and draughtsman.

...The beaver is furnished with powerful incisor teeth, with which it is able to bite through fairly large trees, and its fore paws are very strong. Its hind feet are webbed, so that it is a powerful swimmer, and its tail is flattened, and serves as an excellent rudder. Its ears are small and when laid back prevent any water entering them. Beavers generally live in colonies, and show remarkable intelligence and ingenuity in the construction of their homes or “lodges” and in the building of dams, where water in the vicinity of their dwellings has become too shallow to suit their tastes. These dwellings are often constructed on the banks of rivers, but the Canadian beaver is particularly fond of building lodges in the centre of large expanses of fairly shallow water...

The 6d stamp follows the usual upright rectangular form and its central design consists of the portrait of Prince Albert, the Royal Consort. The portrait is enclosed within an upright oval inscribed in a similar manner to the 3d but with, of course, “SIXPENCE” on its lower portion. The numeral “6” is shown in each of the four angles. Albert Francis Charles Augustus Emanuel the younger of the two sons of Ernest, Duke of Saxe-Coburg-Gotha, was born in 1819... King Leopold and Baron Stockmar had long contemplated an alliance between Prince Albert and Princess Victoria, and the pair were brought

Canada Sc. 2

together in 1836. When the succession of Victoria was assured the betrothal took place, and on February 19th, 1840, the marriage, which was one of real affection on both sides, was solemnized in the Chapel Royal, St. James Palace. The Prince Consort’s position as the husband of a constitutional sovereign was difficult, and in the early years...his interference in matters of state was resented. Ultimately he became “a sort of minister, without portfolio, of art and education”, and in this capacity won much esteem and popularity. He also interested himself in agriculture and in social and industrial reform. To him was due the Great Exhibition of 1851, which resulted in a balance of a million dollars for the encouragement of science and art. His personal character was very high, and he exercised great influence on his children. He was an ideal consort, and entirely worthy of the title “Albert, the Good”.

We continue in this issue with a reprinting, with updates and new images, of *The Stamps of Canada*, a booklet that was produced for *Mekeel's Weekly* by Bertram W. H. Poole.

Chapter III—The First Issue, Cont.

The 12d stamp is very similar in design to the 6d denomination but bears the portrait of Queen Victoria. The life and reign of Queen Victoria are matters of such general knowledge that biographical details are hardly necessary. A few words, however,

regarding the source of this handsome portrait, which was used to adorn so many of the earlier British Colonial stamps, will not be amiss. Mr. Howes tells us that this portrait “was taken from the full length painting by Alfred Edward Chalon, R. A., which was ordered by the Queen for her mother, the Duchess of Kent, as a souvenir of Her Majesty’s first visit to the House of Lords. The occasion was the prorogation [ending of a session] of Parliament, on July 17th, 1837, and the Queen is portrayed in her robes of state, because of which fact the painting is sometimes described as ‘in Coronation Robes’, but this is erroneous.”

The 12d requires a few words in explanation of the manner in which the value was expressed for “One Shilling” would appear to be a more natural form for this amount rather than “Twelve Pence”.

Mr. Donald A. King says:—“This was undoubtedly done intentionally, as though it was intended for a one shilling stamp, yet it could not be called that, as there were a number of shillings of different values in circulation in the Colony. If the stamp had been lettered ‘One Shilling’, the Post Office was liable to have tendered for it 6-1/2d, 7-1/2d, 10d or 12d, according to locality”.

Mr. Howes gives a fuller explanation which we cannot do better than quote in his own words:—

“A glance back at the rates of postage we have already quoted will show that it was generally necessary to give them in two forms, ‘currency’ and ‘sterling’. The somewhat depreciated Canadian currency required fifteen pence, as will be noted, to equal the shilling sterling—a point brought out on the two stamps issued subsequently for the British Packet rates. Add to this fact that in New England the ‘shilling’ was a current expression for 16 cents (10 pence currency), while in New York it represented 12-1/2 cents (7-1/2 pence currency) and we can readily see that in Canadian territory contiguous to these

sections the number of pence to a ‘shilling’ might often be a debatable quantity. As a matter of fact the French Canadians of Lower Canada made general use of the ‘shilling’ as reckoned at 10 pence (20 cents) in the old currency, while the ‘York shilling’ was extensively used in Upper Canada. ‘Twelve Pence’ was without doubt wholly intentional, therefore, as the designation of the stamp, and was a happy solution of any ambiguity in its use, even if it has proved a stumbling block to the understanding of latter day collectors.”

The three values forming this first issue were manufactured by Messrs. Rawdon, Wright, Hatch and Edson, of New York, who are, perhaps, better known to fame as the engravers of the 1847 5¢ and 10¢ stamps for the United States government. All three stamps were printed from plates engraved in *taille douce* [copper plate line engraving] the plates consisting of one hundred impressions arranged in ten horizontal rows of ten each. The manufacturer’s imprint—“Rawdon, Wright, Hatch & Edson, New York”—was engraved twice on each of the four sides quite close to the stamps. The imprints were so placed that the bottoms of the letters are always next to the stamps with the consequence that on the printed sheets of stamps the imprints read upwards at the left, downwards at the right, and upside down on the bottom margins.

A variety of the 3d denomination is catalogued with “double transfer”....“Double strikes” are not uncommon on stamps produced by the line-engraved process though they are not often so striking as the first of these Canadian varieties and those found on the United States 10¢ stamp of 1847.

According to a valuable summary from official records published in the *Metropolitan Philatelist* we learn that the first delivery of stamps from the manufacturers took place on April 5th, 1851, when 100,000 of the 3d denomination were delivered to the Canadian Government. On April 20th, a second supply of the same value comprising 150,200 stamps arrived in Canada. On May 2nd 100,400 of the 6d were received followed two days later by 51,400 of the 12d, this latter being the only consignment of the highest value ever received from the printers. We have already pointed out that the 3d was placed on sale on April 23rd, 1851. The date of issue of the 6d is not known for certain as there are no official records relating to this though, as a supply was received on

May 2nd, they were doubtless issued some time during the same month. The 12d was issued on June 14th as we shall show later.

To Be Continued

The 1851 12d black tied by a target cancel on an 1852 folded letter sheet to New York, showing “Montreal L.C./JY 21 1852” double arc origin date stamp, “Canada” exchange office handstamp in arc, and straight-line “Paid” handstamp—the finest of the seven recorded covers with this stamp.

The Stamps of Canada, Chapter III, Part 4

Based on a Mekeel's Weekly Publication by B. W. H. Poole, with images added

We continue in this issue with a reprinting, with updates and new images, of *The Stamps of Canada*, a booklet that was produced for *Mekeel's Weekly* by Bertram W. H. Poole.

Chapter III—The First Issue, Cont.

The three values of this series, as well as other denominations in pence issued later, were withdrawn from use on July 1st, 1859, when decimal currency was introduced. By means of much diligent search through Post Office Reports and other records Mr. Howes has determined that a total of 3,528,700 3d stamps were issued and a total of 402,900 of the 6d value. Some of both these values were issued with perforation late in 1857 or early in 1858. Unfortunately there is no means of separating these from the imperforate ones as shown by the official figures but if we use the somewhat rough-and-ready means of reckoning afforded by catalogue quotations it would seem that of the above totals about three million of the 3d and 325,000 of the 6d were imperforate.

The 12d value, as every collector knows, is a very rare stamp. Even had the full supply of 51,000 stamps, received in the first and only consignment from the manufacturers on May 4th, 1851, been issued, it would have been a rare variety, but as a matter of fact, the greater portion of the consignment was destroyed and only 1510 were actually issued. ... While we can trace no official notice referring to the discontinuance of this denomination, or the actual date at which it ceased to be used, the writer of the article referred to above says that the balance of 49,490 stamps were destroyed on May 1st, 1857, "in accordance with the practice of the Department in cases of the discontinuance of stamps" though as this was the first Canadian stamp to be discontinued, a precedent could hardly have been established.

The following interesting excerpt from the *Stamp Collectors' Magazine* for April, 1870, states that the 12d value was discontinued in 1855 and it also lays considerable stress on the scarcity of used specimens of this stamp, viz:—

One of our readers observing from a reply we made to a correspondent in the last October number, that we were in doubt as to whether the 12d was ever actually used, has been good enough to write the Deputy Postmaster-General on the subject and has obtained from him the following reply:—

"Ottawa, 28th October, 1869.

Dear Sir:—In reply to your note of the 26th inst., let me say that the twelve penny postage stamps were issued to the public in 1851, but did not find favor, and so few were sold—only a few hundred altogether in three or four years—that they ceased to be issued in 1855.

I am, dear Sir, yours very faithfully,
W. A. Smyth."

This is satisfactorily conclusive as to the emission of the stamp in question; but if even only a few hundreds were used, we are surprised that no used copies turn up. Were they used otherwise than for postage? Mr. Philbrick informs us that no unused copy of the stamp was ever seen by him, nor does he know of its existence. Plenty of proofs on India paper, etc., exist, but the paper of the stamp was laid and thin, of a hard texture.

An extract from the *Stamp Collectors' Monthly Gazette*, published at St. John, New Brunswick, in September, 1869, shows that the rarity of the 12d was already recognised as witnessed by the fact that "even \$5" could be obtained for a specimen. We give the paragraph in full:—

The 1851 12p, Sc. 3, on a cover from Hamilton to New York

This stamp, as some of our readers are aware, was in use but a short time, so short, that many persons even those residing in Canada, knew nothing about it. One gentleman living in Quebec, to whom we had written on the subject some time ago, informed us that we must have been laboring under some mistake, when we asked him for some particulars about it. He told us that no such stamp was ever issued; but a subsequent letter from him told a totally different tale (as was expected)—he gave

A rare block of four of the 12p with Specimen overprint, Sc. 3S

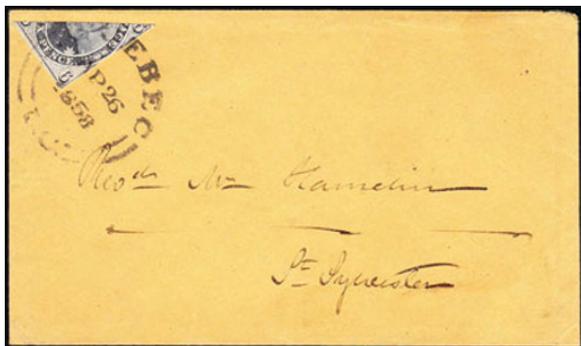

us a few facts, and that was all we wanted. It was first intended for postage to England, and was actually used for a time. The postage was afterwards reduced and the 10d stamp took the place of the 12d. The latter is now one of the rarest in existence, and very readily obtains such prices as \$4.00 and even \$5.00 for one specimen. Proofs are often offered for sale on India paper, with the word 'specimen' written on one side. Amateur collections must content themselves with this last, for it is utterly impossible to obtain the real Simon Pure article for less than the sums we name, and even then, it is doubtful whether it can be had at the price or not. The color of the genuine stamp is black, it is an adhesive, and contains a portrait of Queen Victoria in an inscribed oval, with figures 12 at corners.

All three values of this first set were issued imperforate and while the 3d, of which at least three millions were issued, varies but little in shade, the 6d, printed in comparatively small quantities, provides a number of striking tints. In his check-list, Mr. Howes gives "black-violet, deep-violet, slate-violet, brown-violet, dull purple, slate, black brown, brownish black, and greenish black", and we have no doubt the list could be considerably amplified, though the above should be sufficient for the most exacting of specialists.

The catalogue gives two distinct sorts of paper—laid and wove—for all three values, with a sub-variety of the latter, designated "thin", for the 3d and 6d denominations. But specialists are not satisfied with

this meagre classification and recognise numerous other varieties such as thick white laid, soft white wove, thin and thick grayish, thick hard, thick soft, ribbed, etc. Mr. D. A. King, in his article in the Monthly Journal, says, "There are fourteen varieties that we are able to distinguish", and he gives a general classification of their characteristics...

Bi-sected stamps were not used in Canada to anything like the same extent that similar varieties were used in the other British North American provinces. The 6d is catalogued as having been divided diagonally and the halves used as 3d stamps, though there can have been no real necessity for such bi-section.

The earliest recorded use of the eight known 6d bisects, postmarked Quebec, April 26, 1858

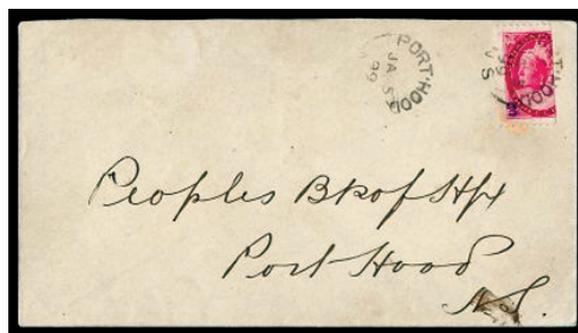

A bi-sected stamp of quite another character was mentioned in the Monthly Journal for April, 1898, as follows:—

The Post Office describes a so-called "split provisional" of the early 3d stamp, which is described as consisting of one and a half of the unperforated 3d on wove, upon an entire envelope postmarked "Port Hope, July 16th, 1855, Canada, Paid 10c." Our contemporary does not appear to perceive that the postmark plainly indicates that the supposed half stamp is really only a badly cut copy; the 3d of Canada passed for 5 cents, and as this letter is plainly marked "Paid 10c", the stamps upon it evidently passed as two 3d, not as one and a half, which would have corresponded to no rate of postage.

The same journal, two months later, made more extended reference to this variety and while its bona-fides as a "split" is established its use as a half stamp is as much a mystery as ever. We cannot do better than give the paragraph in full:—

In the New Issues column of our number for April, we called in question the character of a supposed "split" three pence stamp of Canada, which had been chronicled in the Post Office, New York. In reply to our criticism, Messrs. Morgenthau & Co., the publishers of that magazine, have most kindly forwarded to us the letter bearing the divided stamp, and have requested our opinion upon it. The specimen

is such a curious one and presents, we think, such a puzzle for philatelists, that we have taken the liberty—which we hope its owner will pardon—of having a photographic block made from it, and we give a full size illustration, showing both the stamps and the postmarks, herewith. [The photo was not reproduced in the Poole booklet. JFD.] As our readers may perceive, we were quite wrong in suggesting that the "split" stamp was merely a badly cut copy, as it appears to have been carefully bi-sected diagonally and to have been intended to pass as a half stamp, making up, with the entire stamp to which it is attached, a rate of 4-1/2d. If this were all, though the specimen would be a great rarity—indeed, we believe it to be unique—it would not be necessarily a great puzzle to us. It is true that we do not know of any 4-1/2d rate in Canada, and there never was a 4-1/2d stamp in use there; but still, such a rate might have existed, although there was no possible means of making it up except by the use of at least three 1/2d stamps; but the puzzling part about this letter is that it is addressed from Port Hope in Canada to New York, the single rate from Canada to the United States was 10 cents; the letter is marked "CANADA—PAID 10 Cts." by the side of the stamps, and that rate was sixpence in Canadian currency. The whole document appears to us to be perfectly genuine and bona-fide; we have examined it with a skeptical mind and a powerful magnifying glass, and we can only say that if it is a "fake" it is wonderfully well done. On the other hand, if it is genuine, the half stamp must have done duty as a whole one, because it certainly took two 3d stamps to make up the 10 cents rate. The puzzle remains a puzzle to us, but we are grateful to Messrs. Morgenthau for their courteous reply to what may have appeared a captious criticism

There is a Port Hood Provisional, but it is not related to the "split" discussed above—and which is not listed by Scott. This provisional was created in 1899 and used in Nova Scotia without authorization. The 1898 3¢ (Sc. 78) was split so that it produced 1/3 of a stamp, to be used as a 1¢ stamp (Sc. 88B) and 2/3 of a stamp, to be used as a 2¢ stamp (Sc. 88C), as seen on this cover used within Port Hood. We will cover this provisional in a later chapter from the Pool book.
